

mObridge Product Features

ASTON MARTIN

Product Series

MOST® Digital & Analog Pre-Amp

The mObridge Digital and Analog Pre-amplifiers provide a connection between the MOST system in the vehicle with any aftermarket digital or analog amplifier. The DA series can provide 8 channels of RCA analog outputs, digital Toslink output and an amplifier turn on/off control. Full retention of the factory controls is supported - control Volume, Balance, Fader, and Equalizer (where applicable). There is no need for an external mounted controller or volume knob. The DA3 adds a full graphical interface for complete control of the DSP.

Features Include

PLUG & PLAY HARNESS READY
All components needed to connect and power the mObridge to your vehicle are supplied in this kit.

FIRMWARE UPGRADEABLE
Using the mObridge WIZARD, creates a gateway to change the specification of the mObridge unit. This ensures optimal performance and the latest vehicle compatibility.

MOST
mObridge is a licensed supplier of MOST technology.

Supported Makes & Models
